

Nazib Mahfuz

Web Developer

Summary

I am very much passionate about computer technology and programming. I dream to be an expert software engineer so that I can build professional and useful software which has business value. I'm looking for a place where professional software is made, from which I can learn a lot about software's and I can reach my goals.

Javascript, Ajax, jQuery

C#

MySQL, SQLServer

Work experience

System Decoder

Web Developer

2 Months

I have a little bit experience on professional work. Here I am working some existing projects and implements new features using Laravel Framework.

Projects

1. Hospital Management System

It's a Web based application. The main purpose of this project is to maintain Hospital's all activity through this system. Generate Doctors time slots, Manage patients & Doctors activities, Invoice etc. are the features of this project.
